In *Frontiers for Peace in the Medieval North. The Norwegian-Scottish Frontier c. 1260-1470*, Ian Peter Grohse offers an account of social and political relations in the frontier community of Orkney in the late Middle Ages.

Medieval Iceland is known for the fascinating body of literary works it produced, from ornate court poetry to mythological treatises to sagas of warrior-poets and feud culture. This book investigates the institutions and practices of education which lay behind not only this literary corpus, but the whole of medieval Icelandic culture, religion, and society. By bringing together a broad spectrum of sources, including sagas, law codes, and grammatical treatises, it addresses the history of education in medieval Iceland from multiple perspectives. It shows how the slowly developing institutions of the church shaped educational practices within an entirely rural society with its own distinct vernacular culture. It emphasizes the importance of Latin, despite the lack of surviving manuscripts, and teaching and learning in a highly decentralized environment. Within this context, it explores how medieval grammatical education was adapted for bilingual clerical education, which in turn helped create a separate and fully vernacularized grammatical discourse.

The complexity of distribution systems is augmented by various trends: globalization of the manufacturing industry, rising customer demands, and the reverse flows within closed-loop systems. In this light, the need for 'advanced' planning methods that are based on quantitative optimization is constantly increasing. This book takes up the challenges posed by these developments. In doing so, it presents recent results and case studies from a group of researchers that regularly meet at the IWDL (International Workshop on Distribution Logistics). The text covers the design of distribution networks, vehicle routing, warehousing and reverse logistics. It also contains a comprehensive review of more than 60 case studies in reverse logistics.
