## Chromatography Csun

### *Chem 321 Lecture 21 Chromatography Csun*

Ion-exchange chromatography is a form of liquid chromatography in which the stationary phase is an inert polymer that is derivatized with charged groups that can bind (exchange) ions of opposite charge. The most common cation and anion exchange resins consist of a styrene-divinylbenzene crosslinked copolymer (Fig. 17.1).

### *Chem 321 Lecture 24 - Ion-Exchange Chromatography*

Chromatography is a method (group of methods)

## Chromatography Csun

for separating components of mixtures. A system consisting of a stationary and a mobile phase is necessary for chromatographic separation. The stationary phase is a substance that binds and shortly releases the molecules moving through the system.
