How we got from the random-pack chaos to container order is the subject of *The Box: How the Shipping Container Made the World Smaller and the World Economy Bigger*, by Marc Levinson (Princeton University Press, 1st edition, 2006). Levinson, an economist and writer, is interested in three themes: how transportation technology evolves, the importance of innovation, connection between transportation costs and economic geography (□who makes what where□).

The Box by Marc Levinson (no relation, despite the fact he too writes books on transportation) is a new book on the history of container shipping. It is a fascinating account of this method of shipping's birth in multiple places, but primarily fostered by Malcom McLean, through its growth and expansion, driving the evolution of both the ships that containers sail on as well as the ports at which they are transferred.
