"The Voices of Time" is a dystopian science fiction short story by British author J. G. Ballard. It was first published in the October 1960 edition of *New Worlds*, and later in the 1962 collection *The Voices of Time and Other Stories*. It is an early example of the Inner Space type of story which drove the New Wave movement in the 1960s. Its primary theme is one which was common in the New Wave, that of entropy and the breakdown of all things.

The idea of Time, once so fashionable in the Bergson-Proust-Einstein days, is evidently back in vogue. There have been several recent volumes, among them Priestley's lavish *Man and Time*. The presentation here is more austere, and all things considered, quite the best of the lot. As edited by J.T. Fraser, the collection of commissioned essays is as the sub-title accurately states, "A ...
